National 18s

**UTR LEVEL  
13.00-16.50**

competitive with

College Men: D1  
Pro Men Futures  
Pro Men: ATP  
Pro Women: WTA

# Coach FAQ

**What is the benefit of UTR for high school players?** UTR provides an equalizer for all players regardless of age, gender, national ranking or location. It is the gold standard in college recruiting and the official rating of the ITA. When players have a UTR, they know their level, can track progress, find competitive matches closer to home and even get recruited for college.

**Can I benefit from playing someone with a lower UTR?** Of course. Playing up or down tests different, equally important muscles that are key to developing your game. That said, UTR does not take into account matches from players with a UTR difference greater than 2.0 (unless the lower-rated player wins)

**How is the rating calculated?** UTR is an objective, results-driven rating based on: 1) Strength of opponent; 2) Games won; 3) History of last 30 matches within 12 months. It does not look at wins or losses.

**How does UTR affect players who have never played tennis before?** After one match result a player will have a UTR. After 4-5 match results a player's UTR becomes more reliable.

**How does UTR work for doubles play?** Players have both a singles UTR and a separate doubles UTR.

**What is the difference between UTR & Verified UTR?** They are two different ratings. UTR measures all play, including practice, challenge matches and self-posted scores. Verified UTR only measures Verified UTR matches, including sanctioned high school tournaments and dual matches, USTA results, and other federations & partner results.
